* The ship's "space ratio" (by definition) is the enclosed space (measured in ft³/cubic feet) per passenger. A ship of 45,000 GT (gross tonnage) with capacity 1,000 passengers will have a space ratio 45 (or 45ft³=45000/1000). So if your ship has generally smaller cabins but very large public spaces, she will have a higher space ratio, and the higher the space ratio number, the more guests will enjoy a sense of spaciousness on board.
